

BROADBAND INTERNET DSL Services

HIGHLIGHTS

Complete Services Portfolio — We offer a full range of access, network engineering and remote management services.

End-to-End Nationwide Infrastructure — Our privately managed national network provides the flexibility to deliver a quality experience for business applications.

Superior Customer Support— Our friendly technical experts respond quickly and efficiently 24/7/365.

Reliable, High-Performance Broadband Service Your Business Can Count On

DSL services provide download speeds up to 20 Mbps over a nationwide, multi-redundant private network that optimizes performance and security. DSL is an ideal broadband solution for small and medium-sized businesses that download large files or use the Internet extensively, as well as branch offices and remote workers. We offer a variety of DSL service options to meet the unique needs of your business.

LINESHARE ADSL. Allows information to flow asymmetrically up to 6 Mbps / 768 Kbps for faster email delivery and file downloading.

DEDICATED ADSL. Provides you the asymmetric speed, reliability, and throughput of ADSL without requiring phone service from a local phone company.

SDSL. Provides dedicated line service offering symmetric data transfer, typically up to 1.5 Mbps with guaranteed uptime and Mean Time To Repair (MTTR).
