

## Amazon Web Services

### HIGHLIGHTS

**Expansive Global Reach** — Global Capacity's network uses hundreds of underlying networks interconnected to deliver end-to-end managed network services, including tens of thousands of on-net locations and access to over 2,250 data centers worldwide.

**Ease of Ordering and Management** — Global Capacity's One Marketplace provides customers with network connectivity solutions that extend their network reach efficiently and cost-effectively, delivering the wide area network coverage businesses require without the complexity of managing multiple suppliers.

**Solution For All Business Types** — Global Capacity currently has large multi-location network consumers including large Fortune 500 enterprise clients, Managed Service Providers, Application Service Providers and network owners themselves as they look to more efficiently serve their clients out of footprint.

## Reduce Network Costs, Increase Throughput and Deliver More Consistent Network Performance from Amazon Web Services With a Private Network Connection From Global Capacity's One Marketplace

Your cloud is only as good as your network. Businesses are becoming more and more dependent on connectivity for business activities as they increase Cloud computing services. Connecting to Cloud services across the public Internet comes with increased security and performance issues for mission-critical applications. Many organizations are now connecting to Cloud services via a dedicated, private network for increased security, performance and scalability.

Global Capacity has built private connectivity to industry-leading Cloud computing services such as Amazon Web Services. Global Capacity is an approved Amazon Direct Connect Solution Provider – one of only a handful in the world - providing a dedicated, private and high-performance connection between Amazon Web Services and your data center, office or co-location environment.

---

**RIGHT SOLUTION FOR YOUR BUSINESS.** Whether you need additional bandwidth, a private connection, or a new connection to Amazon Web Services' cloud platform, Global Capacity provides the right solution for your business.

**THE ONE MARKETPLACE ADVANTAGE.** One Marketplace has located points of presence at key aggregation points, such as Equinix, to deliver the flexibility to connect to over 400 Cloud and 600 IT service providers while improving time to market and total cost of ownership.

**ENHANCED PERFORMANCE.** Our direct, dedicated and secure network improves the value of Cloud computing services as user experience, application performance and total cost of ownership improve when compared to leveraging public IP networks to connect to Cloud resources.

**EASE OF ORDERING AND MANAGEMENT.** Global Capacity offers private network solutions that deliver reliable, secure and low latency connectivity between multiple business sites, as well as secure, efficient access to the cloud over its One Marketplace network. Global Capacity's One Marketplace provides customers with network connectivity solutions that extend their network reach efficiently and cost-effectively, delivering the wide area network coverage businesses require without the complexity of managing multiple suppliers.

# Amazon Web Services

## ONE MARKETPLACE BENEFITS

- Over 200 Carrier and Service Partners Worldwide
- Layer 2 Network
- Dedicated Bandwidth
- Private Line
- Ethernet Private Line
- Predictable Latency
- Scalable Capacity
- Pricing Transparency
- Visibility into available capacity across multiple geographies.

**EXPANSIVE GLOBAL NETWORK.** The private connection into your Cloud environment provides predictable latency and high-performance access over our core network. Global Capacity's network reach is one of the most expansive globally, using hundreds of underlying networks interconnected to deliver end-to-end managed network services, including tens of thousands of on-net locations and access to over 2,250 data centers worldwide.

**EXPERIENCE YOU CAN RELY ON.** With more than 230 years of combined telecommunications industry and data transport networking experience, Global Capacity has implemented over 600 network solutions for enterprise customers, carriers, and partners throughout the U.S., U.K. and Canada. With a proven deployment methodology and data transport networking expertise, Global Capacity ensures an efficient network deployment and activation process.

**SOLUTION FOR ALL BUSINESS TYPES.** Global Capacity currently has large multi-location network consumers including large Fortune 500 enterprise clients, Managed Service Providers, Application Service Providers and network owners themselves as they look to more efficiently serve their clients out of footprint.

**APPROVED SOLUTION PROVIDER.** Global Capacity is an approved Amazon Direct Connect Solution Provider – one of only a handful in the world - providing a dedicated, private and high-performance connection between Amazon Web Services and your data center, office or co-location environment.

## About Global Capacity

Global Capacity is the leading connectivity as a service company that improves the efficiency and reduces the cost of data network services globally. Through its One Marketplace, the company brings together customers and suppliers through automated platforms that provides ubiquitous network solutions delivering on its brand promise of Connectivity Made Simple. Global Capacity delivers its innovative solutions to telecommunication carriers, managed service providers, system integrators, and enterprise customers globally.
