

## Google Cloud Platform

### HIGHLIGHTS

#### Largest Interconnected Network Platform

— Global Capacity’s award-winning One Marketplace offers automated pricing from 9.6 million commercial addresses to simplify how businesses securely connect to Google Cloud Platform.

#### Multiple Ways To Connect

— Global Capacity’s Google Cloud Interconnect (GCI) enables businesses a multitude of ways to connect on-premises networks, data centers and other network resources directly to Google Cloud Platform.

#### Access Any Google Cloud Platform

— One Marketplace’s direct Ethernet interconnection can be used to access any Google Cloud Platform resource to create anything from simple websites to complex applications.

## Global Capacity Delivers Private, Enterprise-Grade Connectivity to Google Cloud Platform Via One Marketplace™

A business’ cloud is only as good as its network. Organizations require a dedicated, private network to connect to Cloud services for increased security, performance and scalability. Global Capacity enables businesses to take advantage of direct, enterprise-grade connections to Google Cloud Platform via its One Marketplace™ network.

**OVERVIEW.** Global Capacity offers secure and reliable network access connections to Google’s development environment, Google Cloud Platform, over its aggregated, interconnected Ethernet network. Global Capacity’s extensive reach and innovative One Marketplace application allows real-time network pricing and ordering for Ethernet private connectivity and IP services.

By bypassing the public Internet and procuring private, secure Ethernet connectivity to Google Cloud Platform via One Marketplace, customers have the ability to increase security and performance for their mission-critical applications.

**ONE MARKETPLACE.** Global Capacity’s award-winning One Marketplace is the largest interconnected network platform offering automated pricing from 9.6 million commercial addresses to simplify how businesses securely connect to Google Cloud Platform. One Marketplace provides enterprises with the ubiquitous reach and reliable, high-performance network connections they require to move both private and public workloads from offices and data centers on their Wide Area Network (WAN) to Google Cloud Platform in North America and around the globe.

One Marketplace provides customers with the flexibility, speed and service options to cost-effectively extend network service reach across the globe. The innovative platform leverages a unique combination of aggregation, automation and information to streamline and simplify the process of designing, pricing, procuring and delivering data connectivity solutions.

# Google Cloud Platform

## BENEFITS

- Reduce Network Costs
- Deliver Consistent Network Performance
- Connection Speeds from 1 MB to 100 GB Over Enterprise Links
- Streamline Deployment of Complex Cloud Solutions

**GOOGLE CLOUD INTERCONNECT.** Global Capacity's Google Cloud Interconnect (GCI) enables businesses a multitude of ways to connect on-premises networks, data centers and other network resources directly to Google Cloud Platform. Enterprises have the option of connecting directly to Google over redundant Ethernet connections of 1 MB up to 100 GB, which improves speed, throughput, security and availability. This enables developers to build, test and deploy applications on Google's highly scalable and reliable infrastructure.

One Marketplace's direct Ethernet interconnection can be used to access any Google Cloud Platform resource including Google Compute Engine, Google Cloud Storage and Google BigQuery to create anything from simple websites to complex applications.

Global Capacity's One Marketplace and GCI enable businesses to:

- Reduce network costs, increase throughput and deliver more consistent network performance with a private network connection to Google Cloud Platform.
- Improve speed of connections to Google over enterprise-grade links.
- Gain guaranteed bandwidth and bypass the public Internet to obtain secure, reliable connectivity between the enterprise and Google Cloud Platform.
- Streamline the deployment of complex cloud solutions.

Delivering on its brand promise of Connectivity Made Simple™, Global Capacity's One Marketplace interconnects Google with businesses for private connections and direct access to Google's portfolio of sophisticated cloud solutions.

**APPROVED SOLUTION PROVIDER.** Global Capacity is an approved Google Cloud Interconnect Service Provider, providing a dedicated, private and high-performance connection between Google Cloud Platform and your data center, office or co-location environment.

## About Global Capacity

Global Capacity is the leading connectivity as a service company that improves the efficiency and reduces the cost of data network services globally. Through its One Marketplace, the company brings together customers and suppliers through automated platforms that provides ubiquitous network solutions delivering on its brand promise of Connectivity Made Simple. Global Capacity delivers its innovative solutions to telecommunication carriers, managed service providers, system integrators, and enterprise customers globally.
